Hosted Exchange

Your virtual Exchange server from the CompanyCloud

Hosted Exchange offers you the full functionality of Microsoft® Exchange Server in combination with the advantages of a virtual solution. Synchronize your communication on various clients and improve team communication without costly investments in your own hardware and software. This can be done as a Public or Private Cloud solution.

Features of the Medialine VMX Server:

Email Inbox

- Up to 25 GB of storage space

OWA (Outlook Web Access)

- Includes certificate-based SSL encryption
- Option for 30-day individual mail restore
- Integrated virus and spam protection
- Backup of the inbox

Public Folder

- 1 GB of free storage space
- Comfortable networking of data (such as contacts, appointments, and tasks)
- Creation of your own group calendars, scheduling appointments, and task distribution

Smartphone/Tablet Integration

- Use Hosted Exchange on your mobile device regardless of the platform

Perfect, mobile communication from the Medialine CompanyCloud

Are you looking for an intelligent communication platform for your company that connects all internal and external users regardless of location, facilitates collaboration, and makes work processes efficient and productive? Hosted Exchange from CompanyCloud offers the full functionality of Microsoft® Exchange Server combined with the advantages of a virtual solution.

The offering combines internet standards with high functionality, security, and comfort: your data (such as emails, calendar, contacts, and tasks) is stored not only on your PC, but also in an inbox on an Exchange server.

Centralized storage on a shared platform allows all users to access their data from any computer via the internet, of course password protected. Whether you're at home or in the office, using Outlook, with a laptop via a browser, or on mobile devices such as smartphones or tablets, perfect mobile communication for companies of any size is no problem with the powerful Hosted Exchange from CompanyCloud.
