

ITQ Basic Examination

Measuring Information Security Effectively

In the fast-paced digital era, relying on a perceived sense of IT security is no longer sufficient to tackle the diverse and constantly evolving threats. To ensure comprehensive and demonstrable IT security, it is crucial to rely on objective metrics.

Our ITQ Basic Examination was designed to meet this specific need. Through collaboration with a TÜV-certified IT Security Auditor and Compliance Manager, we provide businesses with a solid foundation for identifying vulnerabilities in both technical and organizational aspects, enhancing the security and availability of their systems, and creating a robust basis for IT investment planning.

This Basic Examination goes beyond being a mere audit; it serves as a strategic tool that empowers management to identify, understand, manage, and monitor necessary IT measures effectively.

ITQ Basic Examination in a nutshell:

- Identification of vulnerabilities in both technical and organizational areas.
- Enhancement of the security and availability of technical systems.

- Assurance of organizational and personnel infrastructure.
- Establishment of a foundation for IT investment planning.
- Validation of IT security through external assessment.
- Mitigation of IT risks and liability for IT executives and managing directors.
- Conducted by a TÜV-certified IT Security Auditor and Compliance Manager.
- Evaluation of the IT basic protection concept on-site.
- Tailored IT audit based on BSI basic protection.
- Available audit versions: ISA – ITQ – ISO 27001 - BSI

Overview:

The ITQ Basic Examination represents the initial step towards achieving a high level of demonstrable IT security for your organization. By identifying vulnerabilities in technical and organizational aspects and by improving the security and availability of your systems, you establish a strong foundation for planning your IT investments.

Execution:

- In-depth interviews with key individuals responsible for IT security.
- Evaluation of both organizational and technical security measures.
- On-site assessment of the IT basic protection concept.
- Customized IT audit based on the BSI basic protection.
- Multiple audit versions available: ISA – ITQ – ISO 27001 - BSI

Outcomes:

- Comprehensive results and management report.
- Objective assessment of the implementation status of specific security areas.
- Actionable recommendations with prioritization and assignment of responsibilities.
- Concrete project plan for implementation.

Service Package for Organizations with fewer than 50 employees:

- Thorough analysis to ensure compliance with information security requirements.
- Assessment consisting of 124 questions across 16 test groups, based on BSI IT basic protection standards.
- Adherence to a nationally recognized standard for information security.

- Cost-effective approach, serving as an ideal entry point or providing advantages for future certification.
- Detailed audit report comprising approximately 80 pages, inclusive of a management report and specific action recommendations.
- An effective tool for measuring and managing your budget to ensure IT security.

Advantages for Your Organization:

- Enhanced information security.
- Improved availability of technical systems.
- Reinforced organizational and personnel infrastructure.
- Solid groundwork for planning IT investments.
- Confirmation of IT security through external certification.
- Reduction of IT risks and associated liability.

The ITQ Basic Examination goes beyond being a standard security audit; it represents a key tool for achieving demonstrable and measurable IT security. Rely on our expertise and experience to elevate your information security practices. Our service offers not only protection against current threats but also the assurance that your IT systems adhere to the highest standards. Contact us to discover how our ITQ Basic Examination can fortify your organization, ensuring a future-proof and reliable IT security strategy.
